Fax: 312.755.9707
www.investigative-agency.com

Investigative Services Agency is a full service investigative agency that provides professional, ethical and competitive investigative and security services. ISA excels at providing in-depth expertise in four main areas; security, corporate investigations, private investigations, and corporate consulting. We are members with the Illinois Detectives Association (ADI), the World Wide Association of Detectives (WAD), and the National Council of Investigations & Security Services (NCISS) these are just a few of the associations that ISA is currently working with in this industry. Whether you are looking to find a person, investigate an employee theft or recover assets, ISA private investigators provide professional and discreet services for all of your private or corporate investigation needs. ISA bodyguards are trained at our local academy by professionals to ensure the highest levels of personal protection. We have trained in the past federal agents from every agency as well as state and local police as well as private investigators and security.

IONA

200 West Street, 4th Floor
Waltham, MA 02451

www.iona.com

Since the early 1990s, IONA Technologies, Inc. has built its integration products around two very significant open industry standards, initially CORBA and more recently Web services, and a unifying approach to designing and implementing large-scale, distributed systems referred to as service-oriented architecture, or SOA.

IONA makes software work together so government agencies can make better decisions, run more efficiently and improve results. Our software products enable government organizations to modernize their IT environments while at the same time lowering total operating costs and ultimately achieving greater return on investment (ROI) on their existing and future IT investments.

(ISC)²

Suite 205
33920 U.S. 19 North
Palm Harbor, Florida 34684
USA

<https://www.isc2.org/cgi-bin/index.cgi>

The International Information Systems Security Certification Consortium, or (ISC)², is the internationally recognized Gold Standard for educating and certifying information security professionals throughout their careers. We've certified over 42,000 information security professionals in more than 110 countries.

Founded in 1989 by industry leaders, (ISC)² issues the Certified Information Systems Security Professional (CISSP®) and related concentrations: Information Systems Security Architecture Professional (ISSAP®), Information Systems Security Management Professional (ISSMP®) and Information Systems Security Engineering Professional (ISSEP®); the Certification and Accreditation Professional (CAP CM); and the Systems Security Certified Practitioner (SSCP®) credentials to those meeting the necessary competency requirements. Several of (ISC)²'s credentials meet the stringent requirements of ANSI/ISO/IEC Standard 17024, a global benchmark for assessing and certifying personnel.

(ISC)² also offers a portfolio of education products and services based upon (ISC)²'s CBK®, a compendium of industry best practices for information security professionals, and is responsible for the annual (ISC)² Global Information Security Workforce Study.

www.netsec.net

Founded in 1998 by former NSA security experts, NetSec is a leading provider of managed security services for federal government agencies and global enterprises. Clients include 9 of the 15 cabinet-level federal agencies, and five of the Global Ten enterprises. NetSec understands the requirements of FISMA, OMB A-130 and other mandates and assists our clients across the board with their security compliance needs. Our Finium co-managed platform enables us to deliver a flexible, co-managed solution that is tailored to your agency's way of doing business. NetSec's proven managed approach to security enables our clients to achieve a superior result in a fraction of the time and at a fraction of the cost of traditional approaches.

netVIZ

12 South Summit Avenue, Suite 300
Gaithersburg, MD 20877
<http://www.netViz.com>

Due to its' ability to provide hierarchical diagrams, relationship modeling and data-embedded graphics, government agencies utilize netViz to comply with Federal Enterprise Architecture mandated by the Clinger-Cohen Act. In addition, netViz has the distinction of being one of the only software tools in history

www.ArchitectureGOV.info www.ConVurgeGOV.info www.SecureGOV.info
<http://www.MobileGOV.org> www.HrGOV.info www.LearningGOV.info

to receive DoDAF compliance for all 26 product views. A data-driven visualization software technology, netViz provides real-time documentation of the IT infrastructure. It connects seamlessly to existing disparate data and publishes consolidated visual diagrams that update automatically when changes are made to the infrastructure. As an added benefit for the government consumer, netViz is now available for purchase via the GSA schedule.

Network Intelligence Corp.

200 Lowder Brook Drive

Westwood, MA 02090

P: 781-375-9300

F: 781-375-9100

www.network-intelligence.com

Network Intelligence is the number one innovator in security event management (SEM). The company's appliance-based product line, the Network Intelligence EngineX has been chosen by more than 500 world-wide customers to capture, analyze and manage raw security related data, transforming it into actionable business intelligence. The appliance is particularly appealing because of its powerful correlation capabilities, its plug and play deployment, and its scalability. The appliance creates a complete picture of network usage, to verify security policy compliance, to generate alerts for possible security breaches, and to analyze and report on network performance. Network Intelligence Corp. – The Best Security is KnowledgeX.

New Energy Technologies

19 South LaSalle Street

Suite 1402

Chicago, IL 60603

Office: (312) 263-0144 | Fax: 312-263-0145

<http://www.newenergywifi.com>

NEW ENERGY TECHNOLOGIES specializes in providing WiFi Standards based solutions and is focused on three basic venues – Government, Municipal and Commercial. To provide easy to use and deploy wireless technology, proven technology and manufacturers have been selected and then integrated into three concept based platforms in order to address the needs and requirements specific to the venues of concentration.

Through the integration and adaptation of these technologies, NEW ENERGY TECHNOLOGIES has developed our mobileNETwrkx concept and family of product offerings. The NEW ENERGY TECHNOLOGIES' solution is comprised of three basic components – NETmobile, NETtrakx, and NETwrkx.

NEW ENERGY TECHNOLOGIES' mobileNETwrkx solution can be dynamically adapted using the NETmobile, NETtrakx and NETwrkx components to fit the requirements – contact us to arrange a demonstration.

New Horizons Computer Learning Centers

People Soft

4460 Hacienda Drive
Pleasanton, CA 94588-8618
800-380-SOFT (7638)
www.peoplesoft.com

PeopleSoft is the leading global enterprise software provider in federal government with more than 150 federal government customers worldwide. PeopleSoft solutions include Human Capital Management, Enterprise Financial Management, Customer Relationship Management, Supplier Chain Management, Asset Lifecycle Management, Analytics, and Homeland Security solutions. As a majority of government workers reach retirement age in the next five years, the federal government expects to lose more than half of its employees. The PeopleSoft Human Capital Management solution will help governments recruit, train, manage, and retain new employees – and serve retirees. And, the solution can rapidly assess skill gaps and needs to maximize your resources. PeopleSoft also empowers employees with self-service applications, which speeds up the process of hiring into the federal government. It's no coincidence that almost 90% of all U.S. Cabinet-level agencies rely on PeopleSoft solutions to execute on their missions.

At the ConVurgeGOV 2004 forum, Joe Gawlik, Vice President, and Chuck Mudd, COO, met with delegates from the FCC and GSA to discuss ways of balancing technology change with business and organizational change, defining and managing the requirements for initiatives and projects that will achieve their objectives.

Skybox Security

2370 Watson Court, Suite 110
Palo Alto, CA, 94303
P: 866-6SKYBOX
F: 650-565-8068
www.skyboxsecurity.com

Skybox® Security, Inc. is the leader of next-generation Security Risk Management (SRM) solutions. The company's flagship product, Skybox® View, is the first enterprise software platform that raises vulnerability assessment, threat analysis, remediation planning and change management to the business risk level where it belongs. By combining business impact analysis and simulation with vulnerability data and network modeling, enterprises can continuously maintain risk-resilient networks, reduce regulatory compliance exposures, and shrink the window of exposure from months to hours. With Skybox View security professionals can take a disciplined approach to measure business risk exposure, understand effectiveness of remediation alternatives, justify mitigation efforts (ROI) and minimize damage from attacks while lowering operating cost. By enhancing current best practices and internal controls with automated risk

management analysis, security, network and business units can work more effectively as a team. Skybox solutions have been successfully deployed at highly respected Global 2000 companies worldwide.

Sogeti USA, LLC

8201 Greensboro Drive

SSH Communications

1076 East Meadow Circle
Palo Alto, CA 94303
P: 650-251-2700

In today's business environment, security is one of the major concerns of IT professionals. End users and OEM's share the need for strong, robust security solutions to protect mission critical data from malicious attacks. As security threats become more sophisticated, the need for security solutions with strong encryption and authentication is a necessity for incorporating secure robust business applications. Depending on an organization's needs, there are many facets of security that must be covered in order to prevent infiltration. With internet complexity and vulnerability increasing companies will require strong security to enable the safe transmission of mission-critical data. The SSH end-user target market is focused on offering enterprise-class security solutions to large corporations, financial institutions and government agencies. SSH's IPSec and Secure Shell toolkits are targeted to OEMs and ODMs who need security functionality embedded into network and remote appliances as well as in silicon.

SuccessFactors

2929 Campus Drive, Suite 400B
San Mateo, CA 94403
www.successfactors.com

SuccessFactors, Inc., the market and web business application leader in on-demand Workforce performance management has over 200 customers and approximately 600,000 paying subscribers worldwide. Additionally, SuccessFactors' products are being leveraged in more than 58 countries and the company has achieved more than 200 percent sales growth for the third consecutive year. SuccessFactors provides workforce performance management solutions that help executives make better business decisions and offer employees clear paths of growth.

SumTotal Systems

1801 North Shoreline Blvd.
Mountain View, CA 94043
Phone: 650.934.9500

Fax: 650.962.9411

<http://www.sumtotalsystems.com>

SumTotal Systems, Inc. is the largest provider of learning and business performance technologies and services. SumTotal deploys mission-critical solutions that align learning with organizational and business goals to generate significant bottom-line results. SumTotal has helped accelerate performance and profits for more than 1500 of the world's best-known companies and government agencies, including US Army, Air Force, Navy and Coast Guard, Defense Acquisition University, Defense Ammunition Center, US Northern Command, New Mexico Department of Health, the State of California, Microsoft, United Airlines, Vodafone, Aetna, Accenture, DSHS, Cendant, Harley-Davidson, Wyeth, Wachovia and D&B.

Sun Microsystems Inc.

4150 Network Circle
Santa Clara, CA 95054

<http://www.sun.com>

Sun Microsystems, Inc. focuses on providing products and services for network computing. It provides network computing infrastructure solutions that consist of computer systems, network storage systems, support services, and professional and knowledge services. These services enable the company's customers to architect, implement, and deploy systems within their information technology environments. The company also offers a range of system/network architecture, implementation, and management, as well as consulting, skills migration, and training. Its computer systems include a line of workgroup and enterprise servers, UltraSPARC microprocessors, and software that are integrated for network computing environments. The software offerings consist primarily of enterprise infrastructure software systems, software desktop systems, developer software, and infrastructure management software. Its network storage systems integrate servers, storage, and software to support heterogeneous environments. Network computing infrastructure solutions are used in a range of technical/scientific, business, and engineering applications in industries, such as telecommunications, government, financial services, manufacturing, education, retail, life sciences, media and entertainment, transportation, energy/utilities, and healthcare. The company sells its networking architecture platform solutions worldwide through direct and indirect channels. It also offers component products, such as central procession unit chips and embedded boards on an original equipment manufacturer basis to other hardware manufacturers; and supplies after-market and peripheral products to their end-user installed base, directly, and through independent distributors and value added resellers. The company has strategic alliances with Fujitsu Limited, Imation Corp., and Wyse Technology. Sun Microsystems was founded in 1982 by Scott G. McNealy and is headquartered in Santa Clara, California.

Systinet Corporation

1 Van De Graaff Dr., 5th Fl.
Burlington, MA 01803

<http://www.systinet.com/>

With our products, government agencies can maximize the value of their legacy investment while advancing their long-term IT strategies.

YRCI

3877 Fairfax Ridge Road, Suite 300C

Fairfax, VA 22030

P: 703.995.9600

F: 703.995.9610

<http://www.yrci.com/>

YRCI is a small, veteran-owned business on the GSA Schedule for HR General Services 738X. 25 Federal agencies have called upon YRCI to provide HR Outsourcing Services from small projects through complete outsourcing of an HR organization. Our project at the Department of Homeland Security Headquarters involves all aspects of Human Resources including staffing, classification, performance management, employee relations and personnel action processing, including NFC access. YRCI's recruiting experience extends well beyond the typical Federal staffing process. In just 12 months, our recruitment and placement effort has helped DHS grow from 250 employees to well over 1000. YRCI substantially exceeds OPM's hiring target of 45 days from the close of a vacancy announcement to date of initial offer. For this project, YRCI has successfully averaged fewer than 37 days per hiring action. YRCI provides exceptional people exceeding expectations.
