MobileGOV Announcement:

Growing trends in the Mobile Government community have identified a need for the NetworkGOV Annual Strategic Intelligence Council Meeting to shift in a direction more heavily focused on Mobile and Wireless. Industry and Government have started to integrate new mobile technology into their networks causing traditional networks to be replaced by mobile networks. The growing trend has helped advance technology by making it more cost effective and easier to access remotely. Changes in technology and the use of such, have led to new solutions for the government as well as new issues and initiatives that need to be resolved before mobile technology being used in the government can be advanced. It is for this reason that NetworkGOV is being re-introduced as the NEW **MobileGOV!**

"With the current trend of mobile networks replacing traditional networks we need industry leaders to teach the government what new solutions are being developed and how they will impact their technology strategies and infrastructure," Kelly Yocum, CEO ConVurged, "ConVurged feels that **MobileGOV**, the NEW NetworkGOV Strategic Intelligence Council Meeting, will provide a much needed platform for mobile and wireless focused information sharing, cutting-edge technology pilots with live demonstrations, and key executives from both government and industry to /converge/ on addressing these critical issues."

MobileGOV is going to cover the following areas:

- M2M
- Wireless Security
- SCADA
- Remote Wireless Monitoring
- RFID
- WiFi/WiMAX
- MNVO
- 3-G
- Mobile Positions & Location (GPS)
- Location Based Service
- Messaging (SMS/MMS)
- Public Safety & HLS
- Mobile Device Management
- Indoor Wireless Solutions
- 802.11/12
- Wireless Lans
- Encryption

The additional areas surrounding government networks will still continue to be included in the program and tied in with the mobile and wireless shift.

In addition to many other areas of topics being covered, we are currently conducting a call for papers from industry experts which would be considered in building the program.

To find out more about **MobileGOV** and how you can get involved visit www.MobileGOV.org or contact Melisad@ConVurged.org

Securing Your Data

Keep Tabs On Where Your Data Is & Where It's Going. Companies like Google advertise Gmail by saying you never have to delete anything. And in our litigious society, you need to hold on to data because the one with the most data wins, says Walter Scott, president and CEO of disaster-recovery application provider Acronis.

Army Reports Big Savings from Enterprise Buys

The Army Research Laboratory (ARL) and the U.K. Ministry of Defense have awarded IBM Corp. a \$135.8 million contract to perform research and development of technology on secure wireless and sensor networks that can enable communication between military forces. IBM will lead a consortium called the International Technology Alliance, which is comprised of defense contractors Boeing Co., Honeywell International Inc. of Morristown, N.J., and academic and governmental organizations.

IT Tools are Clogging the Airwaves

Who gets access to the nation's airwaves is an issue that has been debated for decades. While wireless companies have pressured the government to free up more frequencies so they can continue to roll out wireless services, the Defense Department has been free to deploy all types of spectrum-dependant equipment to help it fight the war on terror.

Accenture, HrGOV 2005 attendee, along with Symantec Corp. announced the establishment of Accenture and Symantec Security Transformation Services, an organization that will build and implement data security solutions for companies grappling with the increasing complexity of managing risk in their IT environment. [Click Here](#) for more

BrassRing, HrGOV 2006 attendee, announced an agreement with Kenexa, a leading provider of software, services and proprietary content that enable organizations to more effectively recruit and retain employees. Under the terms of the agreement, Kenexa has agreed to pay an aggregate purchase price of approximately \$115 million for all of BrassRing's assets, including \$10 million in net cash. [Click Here](#) for more

Clearswift, SecureGOV 2005 attendee, announced that its DeepSecure 2.1 message security software has passed common criteria Evaluation Assurance Level 4 (EAL4); making it the world's only EAL4 certified ACP 145 compliant security solution. DeepSecure is specifically designed to meet the needs of organizations where security is paramount, such as in the military, government and defense industries. [Click Here](#) for more

Convergys, HrGOV 2004 attendee, announced a 5-year contract with BT to expand the use of Infinys, Convergys' state-of-the-art billing and customer care solution, to support all of BT's consumer, business, and wholesale customers. BT is one of the world's leading providers of communications solutions serving customers in Europe, the Americas, and Asia. [Click Here](#) for more

Lexis Nexis, LearningGOV 2007 attendee, announced the launch of the Screening and Identity Verification component of its LexisNexis Advanced Government Solutions offering. LexisNexis Screening and Identity Verification Solutions combine best-in-class data, data fusion, advanced scoring and policy-compliant tools for enabling government agencies to effectively authenticate identities, conduct background screening and detect fraud. [Click Here](#) for more

Lucent Technologies, NetworkGOV 2004 attendee, announced that EVNTelecom (formerly known as Vietnam Power Telecom) has selected Lucent for its phase III CDMA450 network expansion project. The two companies have already deployed an advanced wireless network to provide voice and mobile data services based on CDMA450 technology - Lucent's CDMA2000 solution for the 450 MHz spectrum band - in the northern provinces of Vietnam. [Click Here](#) for more

Lumeta, SecureGOV 2006 attendee, announced a new service to assist federal agencies and commercial enterprises in transitioning their network infrastructures from the Internet Protocol Version 4 (IPv4) to Version 6 (IPv6). Lumeta's IPv4 to IPv6 Migration Planning Service leverages the company's flagship network assurance solution, IPsonar, to provide a starting point and initial road map for IT professionals to meet the migration demands

imposed by deploying the next generation of Internet protocol.

Ounce Labs, SecureGOV 2005 attendee, announced product integration that combines its product's source code security assessment results with findings from Cenzic Hailstorm, SPI Dynamics WebInspect, and Watchfire AppScan. Advancements in Ounce's open architecture enable customers now to import results directly from their existing penetration testing tools to achieve a higher level of insight into the security of their software.

[Click Here](#) for more

SSH Communications, ConVergeGOV 2003 attendee, announced that Tampere University of Technology has selected the SSH Tectia Client and Server products to secure data communications in the university network. The SSH Tectia University Licensing Program allows the university to cost-effectively deploy and maintain the SSH Tectia client/server solution throughout its large-scale network.

[Click Here](#) for more

Taleo, HrGOV 2006 attendee, announced the availability of a fully integrated, advanced sourcing and talent management solution. By delivering a comprehensive sourcing and talent management solution, Jobster and Taleo are enabling organizations to simplify the difficult process of finding and hiring the right candidates, particularly passive candidates.

[Click Here](#) for more

Troux, Enterprise ArchitectureGOV 2004 attendee, announced the release of the first Actionable Enterprise Architecture (AEA) Platform designed to give IT and business decision makers an unprecedented degree of visibility throughout an organization. Troux's AEA Platform provides CIOs, their IT groups and business executives with the 'as is' and 'to be' information they need to make critical business decisions, develop corporate strategy and evaluate the organization's progress against corporate goals all from a single aggregated view and purposed specifically for individual roles.

[Click Here](#) for more

Versant, Enterprise ArchitectureGOV 2004 attendee, announced the launch of its new Academic Program, which offers a special discounted rate for the use of the Versant Object Database to the faculties of educational institutions who wish to use the software for non-commercial use, including lectures, research and classroom teaching.

[Click Here](#) for more

WildPackets, SecureGOV 2004 attendee, announced that Computacenter, the well-known Provider of IT infrastructure services, will predominately use products from its OmniAnalysis Platform for measurements in high speed environments as well as performing troubleshooting services in WLANs and VoIP Installations. Computacenter has selected WildPackets' OmniAnalysis platform because it was the only network analysis solution available on the market today which could meet all of their requirements regarding reliability, usability and flexibility.

SecureGOV 2005 Photos and Testimonials

"[The ConVurge business] meetings give us access to the buying network of government officials which are normally hard to get in touch with. By doing so, it accelerates the buying process." - *Client Executive, Sogeti*

"Everything is as advertised. We are getting very good leads. [SecureGOV 2005] is better than other industry events because of the overall management and the layout. These little offices [ConVurge] set up for us, the delegates coming in on time; it's all run very smoothly. [The attending delegates] are definitely the right people to talk to - the right level." - *Senior Director, NitroSecurity*

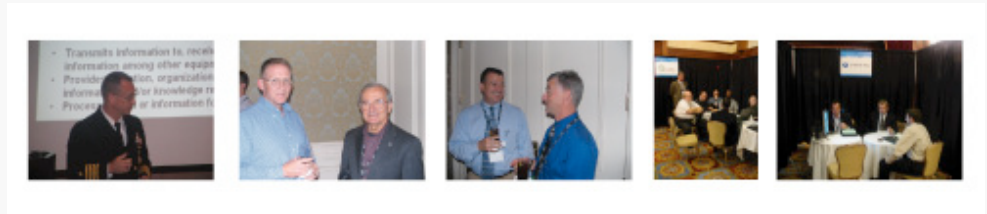

"We are impressed with the quality of the attendees. These people are truly willing to listen and share information. You know they are here for a reason." - *Vice President, Federal Operations, CipherTrust*

"Thank you very much for an informative and productive session. It was a pleasure to meet you and your staff. I would like to especially thank Seth and Amanda for their professionalism, business savvy, and dedication. The customer service was exceptional. I'm definitely going to come back and recommend this event to my colleagues." - *IT Program Manager, US Department of State*

"I AM DEFINITELY EXCITED ABOUT IT!! These interactive presentations have been right on

target. Every time I wasn't in a business meeting, I was right there soaking up everything I could." - *Information Management Officer, US Department of Defense*

"Every manager can benefit from this kind environment. I loved the contacts made during my stay. If people can see it and they can play with it, they'll be more interested in it. The biometrics demonstration was PERFECT!" - *Supervisory Special Agent, ESOC, US Department of Justice*
